Subject: FW: Request for data on Regional PFAS Places of Interest - reply requested by 13 December 2019 to PFASData@epa.gov

Good Morning Everyone,

As requested below is the draft email for your review, approval and dissemination to the Regional and Program Office PFAS Contacts who have yet to provide us with their Places of Interest information. I've included as attachments above the fact sheet we sent out with the original request, as well as, the data call POI spreadsheet from that same request. Today I downloaded the Places of Interest list from the National PFAS Data Explorer and also added it above for your review and inclusion in the outgoing email. Once ERG confirms below, if there is no other information to convey to the recipients the email can go out. My understanding is that email will sent by Andy G. consistent with the previous communications.

For Andrew (ERG):

Please verify that the Places of Interest Export (20 Jan 2020) contains the Removal Actions, Region 5 and Superfund information we received. If not, please provide an updated spreadsheet with that information. Also, confirm the link the Mash up below is the most recent version of the tool.

[Email to PFAS Data Contacts.](#)

ORD Executive Lead for PFAS R&D*

Office 919 541 3655 Cell Ex. 6 Personal Privacy (PP)

Please let me know if you have any questions.

Thanks,

Alex

Subject: Request for data on Regional PFAS Places of Interest - reply requested by 13 December 2019 to PFASData@epa.gov

Regional PFAS Contacts:

As I mentioned on the EPA PFAS Coordinating Committee call this week, we are looking to update and incorporate Regional information into a cross-Agency list of PFAS Places of Interest for incorporation into the public release of the National PFAS Data Explorer (previously known as the PFAS Analytic Tools). The beta version of the public PFAS Explorer tool is available at the link below. We are still addressing some internal agency issues before starting the rollout, which will include briefings for you and other EPA staff prior to public release (which is currently anticipated for FY 2020 Q2).

Ex. 6 Personal Privacy (PP)

The starting point for the list is information that had been previously reported to OW (Hannah Holsinger). The process of developing a consolidated list is outlined in the attached documents. Specifically, this request relates to PFAS Places of Interest based on Regional drinking water concerns (and are not part of the OLEM/Superfund list). The attached spreadsheet includes a list of known, previously reported Regional places of interest. Via this email, we are requesting that you assist in completing data fields, as appropriate, filling in the relevant columns in the spreadsheet. If you now have additional sites that you would like to add, please feel free to add rows to the spreadsheet and provide the requested data.

This information will be incorporated into the public release of the National PFAS Data Explorer (previously known as the PFAS Analytic Tools), so please ensure that the information is suitable for making public and is written for a public audience. Please see the attached document for more guidance on how to report.

We are asking for the data by December 13th, but if that presents a problem or if you have other questions, please contact me so we can discuss. Please send your completed data sheets to PFASData@epa.gov with a copy to me.

Thank you for your consideration, best regards, Andy (on behalf of the PFAS Explorer Development Team)
